

Curriculum Prerequisite Summary for BS in Computer Engineering
Computer Engineering Department, San Jose State University

This list was compiled by Raquel Espinoza and is based on course information gathered from AVP approved curriculum change forms submitted by the Computer Engineering Department and the SJSU printed catalog of courses for the following years: 2000-2002, 2002-2004 & 2004-2006.

The subsequent tables are a mapping of the prerequisites for each of the required courses in the BS degree in Computer Engineering. The prerequisite mapping is listed by semester starting from Fall 2000 through Spring 2005.

Grade requirements for prerequisites are indicated by asterisks. One asterisk (*) indicates a grade requirement of C or better and two asterisk (**) indicates a grade requirement of C- or better. The Co index such as (CmpE 125)^{Co} indicates the course is a corequisite. In some cases a course may be a prerequisite or corequisite. Alternates to required courses are indicated in brackets such as [MatE 153] which is an alternate for ME 109. The following are abbreviation: HS (High School), WST (Writing Skills Test) & ELM (Entry Level Math exam).

Index numbers after a course (i.e. CmpE 124¹) indicate a curriculum change form was submitted for this course. This change may not have been reflected in the printed catalog. One change form may be associated with multiple courses. Refer to matrix at the end of this document for individual change details. If an index after course is a letter (i.e Chem 1A^C) then a change was noted based on the printed catalog.
