

Graduate Student Position: Study on Development of Secondary Airports in California

A graduate student research assistant position is open on a project to study the Development of Secondary Airports in California. The project is funded through the Mineta Transportation Institute at San Jose State University.

The major role of the research assistant will involve assisting in the literature review and collecting data on case studies for the topic from the library and other electronic and print media. The research assistant will be required to help draft relevant sections of the final report. The research assistant may be assigned additional tasks depending on their background and experience. Additional tasks may include developing a policy guidance framework and strategies to develop secondary airports, and maintaining communication with the sponsoring agency through progress reports.

Requirements: Graduate students pursuing degrees related to aviation, transportation engineering, policy, planning and economics are preferred. In addition students with an interest in the related research topic and strong writing skills are encouraged to apply.

The pay rate is \$15 per hour, and the graduate student in this position expected to work for about 380 hours for this project within one year.
