Practical Problem (PP22)

Model or create a class diagram of each of the following concepts using software stability model, resulting stable analysis pattern for EBT and stable design pattern for BO.
No documentation
No meta models.
No Implementations.

How: For each concept do the following:
1. Create 3 scenarios (usage) for each of the following concepts
2. Extract Common properties
3. Create the pattern based on Software Stability

Example of one of my student’s work: See design session No. 8.
