Santosh is a graduate student at San Jose State University who believes, in most cases reaching a goal means to accept challenges in order to follow your dreams. He conceives a dream as to do something innovative and fancying such as Steve Jobs and leave his mark in this world, this resulted in a determination and undeterred goal of making his own contribution to this technology. Santosh completed his undergraduate studies specialized in Computer Science and Engineering from J B Institute of Engineering and Technology, affiliated to JNTU, Hyderabad. He has a natural affinity towards developing software’s in C, C+ & JAVA. Also areas of computer science such as Web Technologies, Data Base Management Systems, Operating Systems interests him a lot for the reason that they serve solutions to real life complications. He desires to realize his full potential and to make an original contribution to the field of Computer Science which drove him to pursue Masters. With this he hopes to perform to the best of his abilities and acquire skills that will help him realize his dreams.
