ME285 Lab 2 Assignments (Due: one week from your lab day)

(1) Read through the DVT handout I gave to you two weeks ago (I will also post it in our course website)
(2) Define a product inspection or measurement task (you can chose a key, or nut, or screw, etc)
(3) Use DVT system to implement the inspection or measurement task
(4) Write a group report (with group members’ names) including: (a) Introduction of the task; (b) Inspection/measurement methods you used (features in the SoftSensor); (c) your inspection/measurement results; (d) conclusions. About 5 pages total.

Note: students will be divided into 6 groups: 3 groups will do lab on Thursday, another three will do next Tuesday (after lecture)
